# manyfastscan.com October 2023 New Features and Updates

- **We are excited to announce that *manyfastscan* can now process Amazon FNSkus (barcodes starting with "X") from Amazon.**

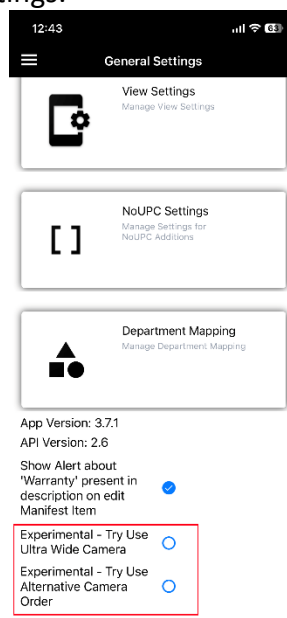

- **Automatic removal of warranty mentions in Item Description**
    - If there is mention of a warranty for in an item description, our AI will remove it from the original data. Your listings will not mention warranty.

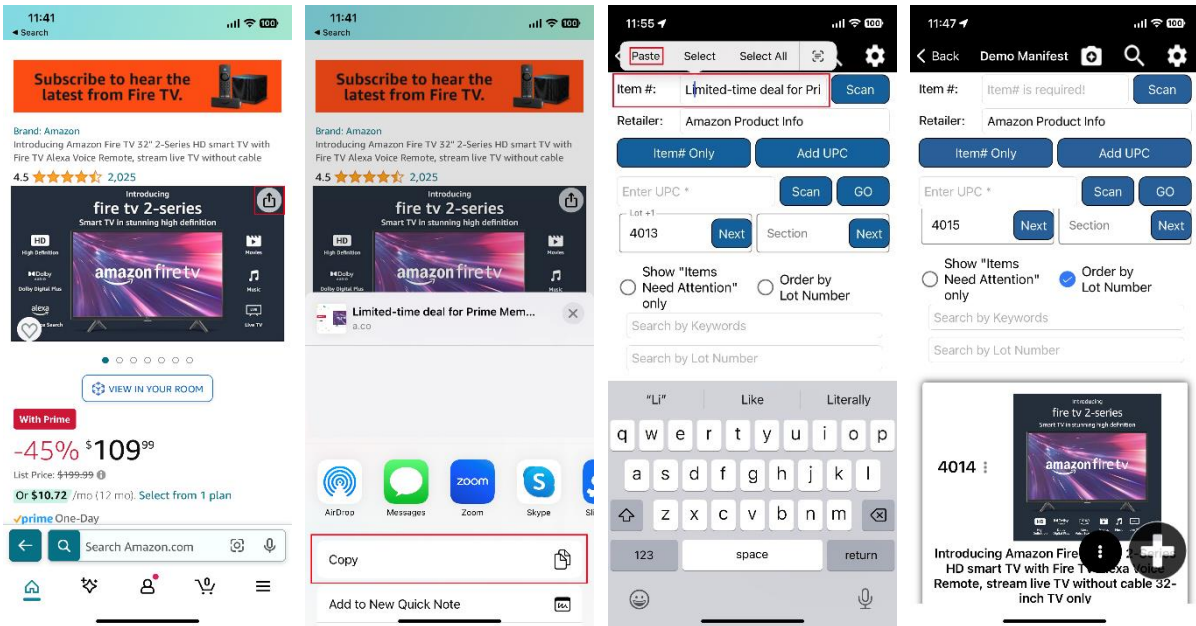

- **Barcode scanner fix for iPhone 13+ Devices**
    - If experiencing issues when scanning barcodes with an iPhone 13 or newer, try selecting one of these settings in General Settings.
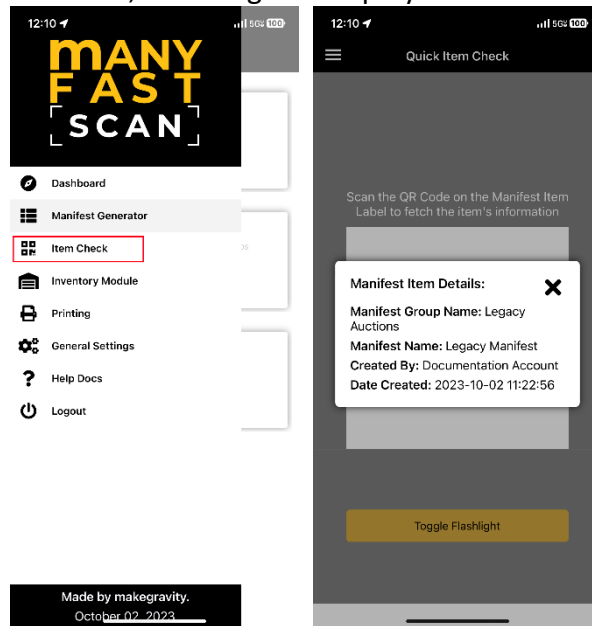

- **Walmart, Target, Amazon Share URL addition supported**
  - *manyfastscan* now supports adding Share URLs to your manifest when in Item Scanning Mode
  - Find the product on the Retailers' app, copy the URL and paste into *manyfastscan*

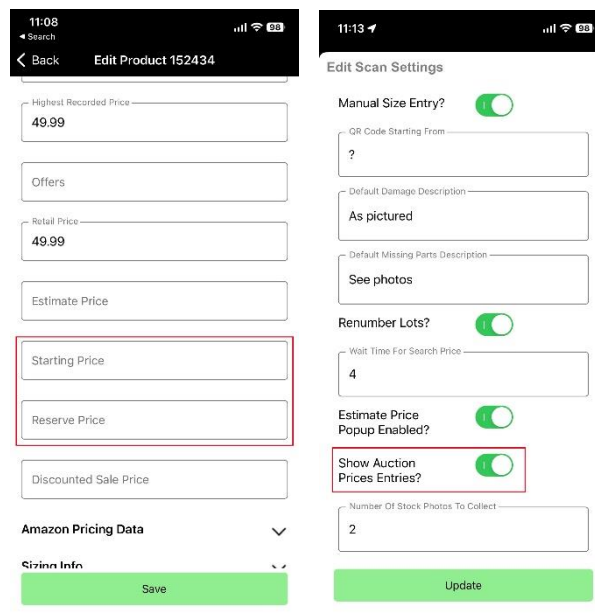

- **Item Check Feature**
  - Select 'Item Check' from the app menu and scan the QR code on the *manyfastscan* label. It will provide details on the item, including the employee who made the listing.

- **Reserve & Starting prices now available fields in 'Edit Item'**

- **Added character count on 'Edit Item" view on Manifest items.**
  - This will allow you to craft the perfect time and know whether your auction software will cut-off the title due to length restrictions

- **Added "Created by: User" to 'Edit Item' view**

- **Dick's Sporting Goods is now an available data source**

- **Customize your view for all items in the View Settings/NOUPC Settings**
  - Ability to show/hide the fields on Add NoUPC view
  - Ability to show/hide the fields on Edit Manifest Item view
  - Ability to dynamically toggle required rules for fields on Add NoUPC view
  - Ability to dynamically toggle required rules for fields on Edit Manifest item view

- **When using AI Photo Recognition, we are now adding the original search image as a first uploaded image**

We thank you for user feedback and feature requests. *manyfastscan is committed* to speed and accuracy of data and product creation. We have worked diligently to improve the *manyfastscan* user experience to increase productivity.
