[Learn more about apps](#)

← **App development**

Start developing apps on your store

Develop your own apps to integrate your store's data with external services or build custom storefronts.

App development should only be done by trusted developers on your team. Apps can give API access to your data, and that data can be accessed outside of Shopify.

All apps are subject to the [Shopify API License and Terms of Use](#).

Allow custom app development

[Learn more about developing apps for your store](#)

You are about to allow custom app development on your store 

This can't be undone.

Apps are subject to the [Shopify API License and Terms of Use](#).

Creating apps generates access tokens that provide API access to your data. You're responsible for keeping these tokens and the data they access secure.

You should only give staff and collaborators that you trust permission to develop apps for your store.

[Cancel](#) **Allow custom app development**

4. Select 'Create an app'

← **App development** **Create an app**

Private apps were automatically converted to custom apps ×

Your apps will continue to function as they did before.

5. Name and click 'Create app'

Create an app ✕

App name

App developer

 ↕

Can only be assigned to staff and collaborators with permission to develop apps. We'll contact them about development updates, like changes to Shopify APIs.

Apps are subject to the [Shopify API License and Terms of Use](#).

6. Select 'Configure Admin API scopes'

App development > manyfastscan Install app

Overview Configuration API credentials App settings

Select your access scopes to get started

 Retrieve and sync store data with the Admin API.  Develop unique shopping experiences with Storefront API.

View or manage conditional discounts

- write_price_rules
- read_price_rules

Products
View or manage products, variants, and collections

- write_products
- read_products

Store content
① Includes personally identifiable information
View or manage articles, blogs, comments, pages, and redirects

- write_content
- read_content

 If you don't have permission to access a scope, [find what you need to request from the store owner](#).

8. Click on 'Overview' to go Back. Now, click on 'Configure Storefront API scopes'

9. Set Storefront API to the following and click **Save** at the top of the screen

The screenshot shows the 'Storefront API access scopes' configuration page. It is organized into several sections, each with a category name, a description, and a list of permissions with checkboxes. The permissions are as follows:

Category	Description	Permissions
Checkout	Read and modify checkouts	<input checked="" type="checkbox"/> unauthenticated_write_checkouts <input checked="" type="checkbox"/> unauthenticated_read_checkouts
Content	Read content like articles, blogs, and comments	<input checked="" type="checkbox"/> unauthenticated_read_content
Customers	Read and modify customer details	<input checked="" type="checkbox"/> unauthenticated_write_customers <input checked="" type="checkbox"/> unauthenticated_read_customers <input checked="" type="checkbox"/> unauthenticated_read_customer_tags
Metaobject entries	View or manage entries	<input type="checkbox"/> unauthenticated_read_metaobjects
Products	Read products, variants, and collections	<input checked="" type="checkbox"/> unauthenticated_read_product_listings <input type="checkbox"/> unauthenticated_read_product_inventory <input type="checkbox"/> unauthenticated_read_product_pickup_locations <input checked="" type="checkbox"/> unauthenticated_read_product_tags

10. Select 'API credentials' and click 'Install App'

The screenshot shows the 'App development' configuration page for an app named 'manyfastscan'. The page has a breadcrumb trail: 'App development > manyfastscan'. There are four tabs: 'Overview', 'Configuration', 'API credentials', and 'App settings'. The 'API credentials' tab is selected and highlighted with a red box. In the top right corner, there is an 'Install app' button. Below the tabs, the 'API credentials' section is visible. It contains a sub-section 'Access tokens' with a gold coin icon. The text reads: 'You don't have any access tokens yet. To get your Storefront API access token, install your app.' Below this text, there is an 'Install app' button, which is also highlighted with a red box.

11. Once the Storefront API access token is created, click on Overview

12. Select 'Manage Credentials'

13. Click Reveal token once and copy the value

14. Go to eCommerce Settings in manyfastscan and turn on live mode

15. Set these fields in the eCommerce manyfastscan settings

Shopify Live Shop Url

Shopify Live Access Token

Shopify Live Shop Url is the name of your store i.e. yourname.myshopify.com

Shopify Live Access Token is the Admin API from Step 13 above.
